

# ERAU Virtual Hub

## Introduction

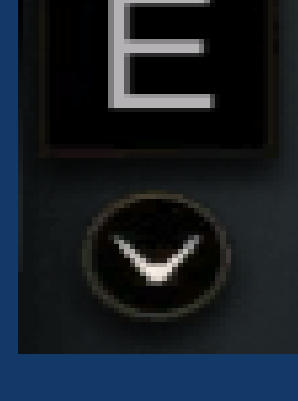

Welcome to the ERAU Virtual Hub

When you first enter the lab you'll be able to move around using the w,a,s, and d keys. Use the mouse to look around.

Once you step through the Assembly Lab doors, you will be able to build, design, and fly a variety of Unmanned Aircraft Systems.

To enter any door, select the

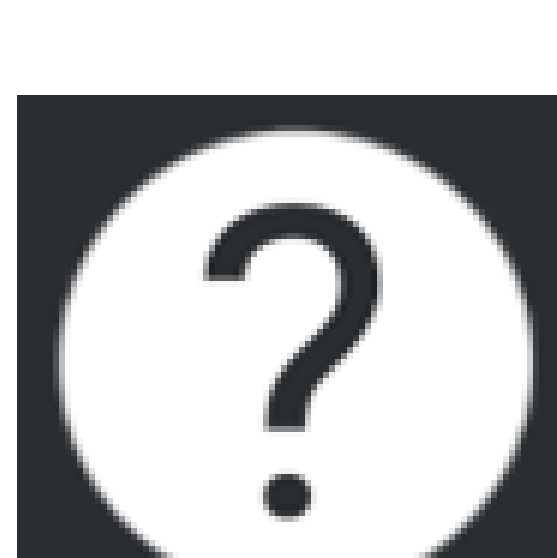

## Settings Panel

**The Home Button:** This button allows you to return to the ERAU Virtual Hub Lobby.

**The Camera Button:** This button allows you to access previously taken screenshots throughout the labs, and export or delete them.

**The Help Button:** This button allows you to seek further help, documentation and information regarding the lab you are currently using.

**The Settings Button:** This button allows you to change various settings throughout the program.

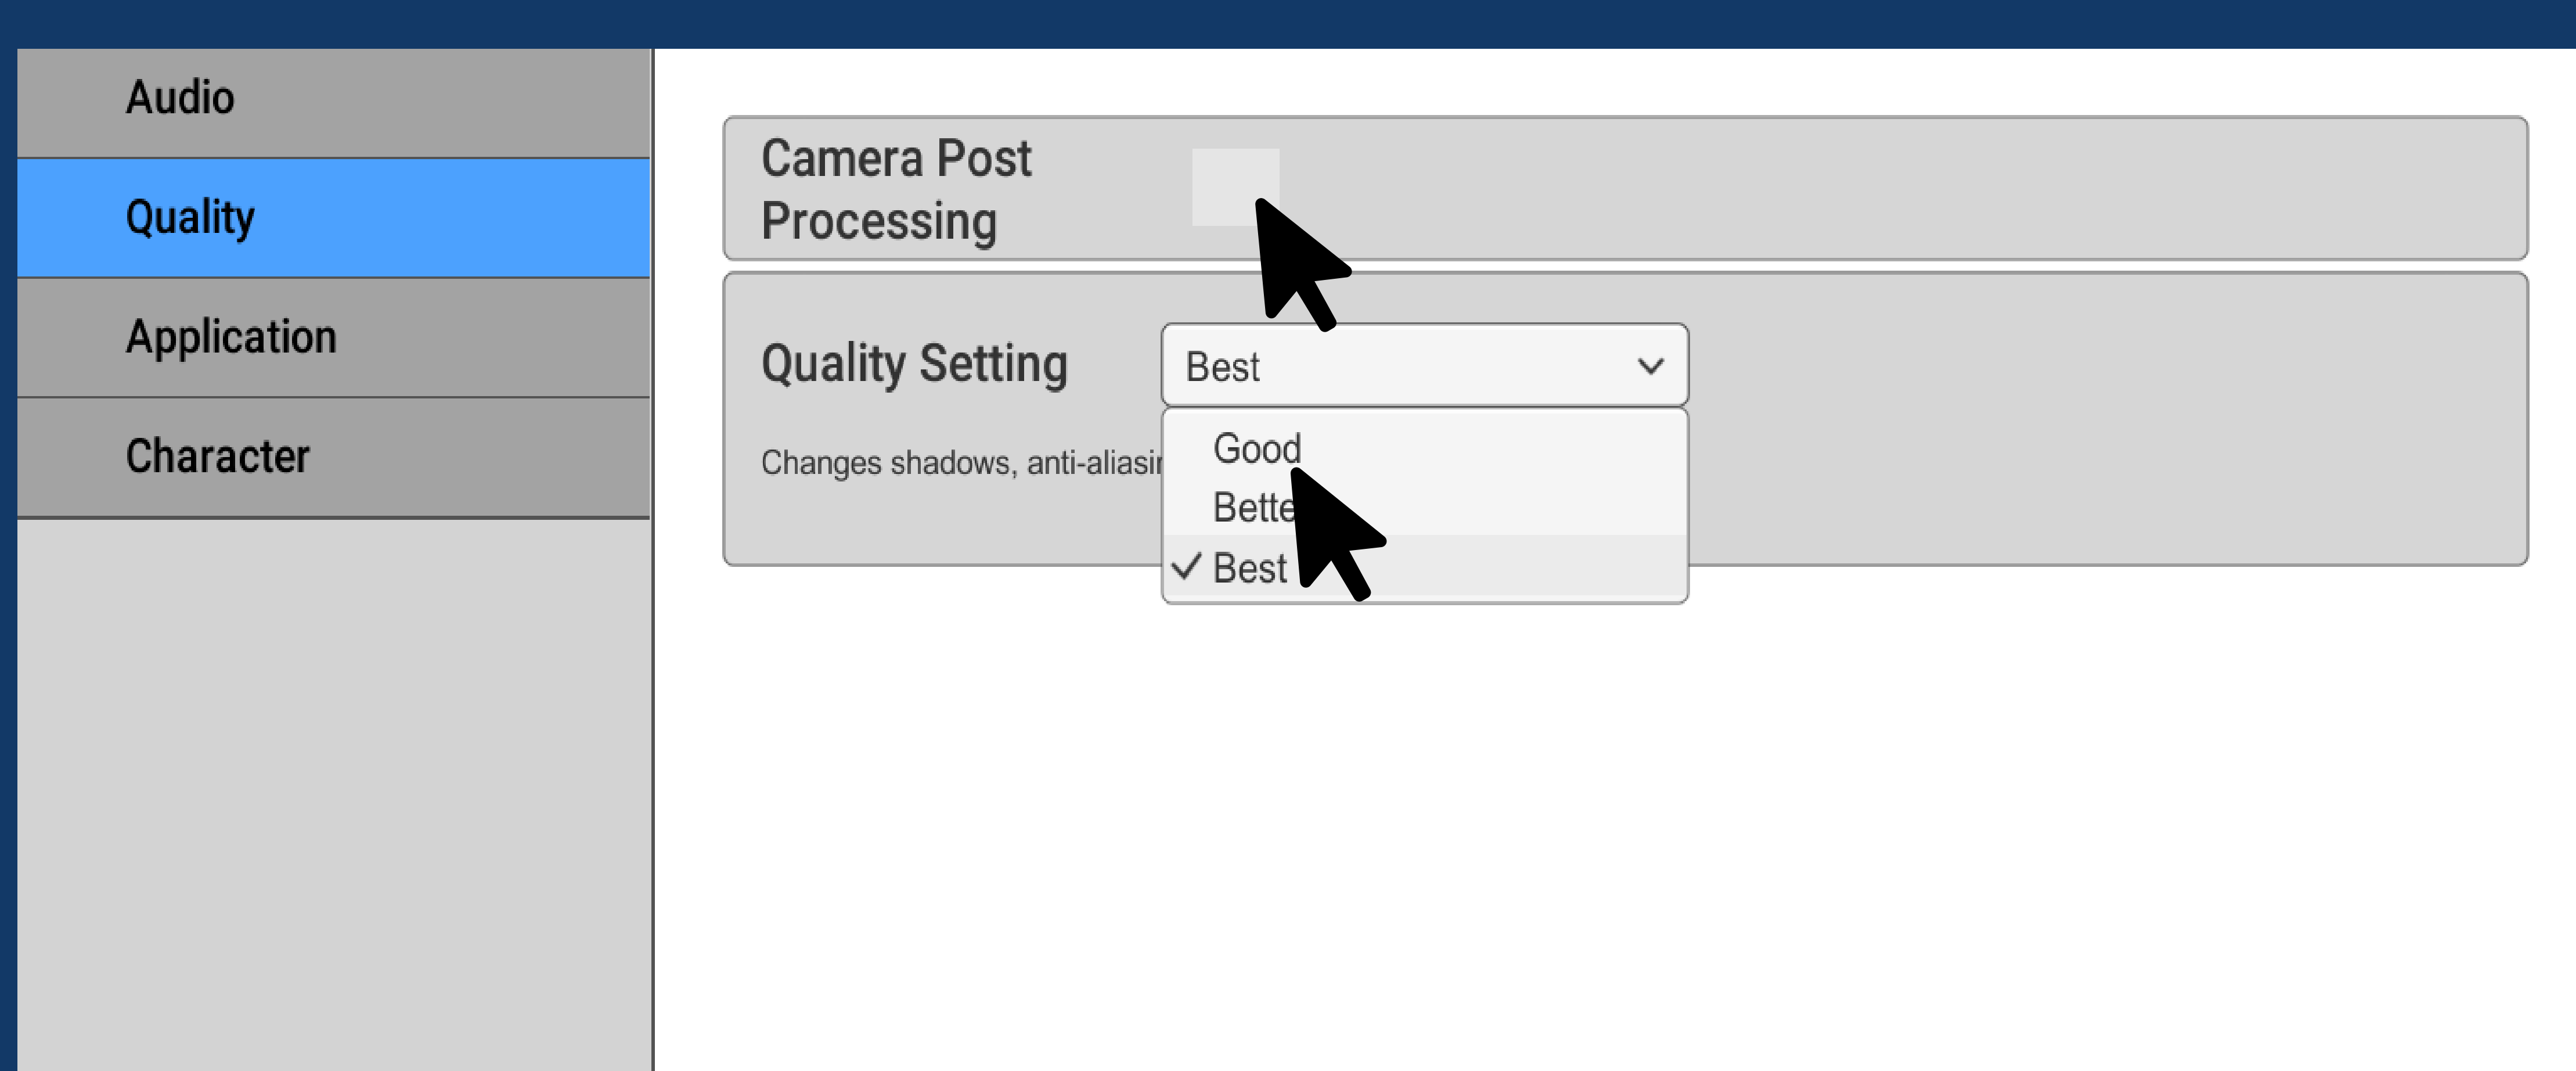

## Control Information

When you enter a lab which requires controls to move around, you will find a panel on the bottom of the screen which shows the general mobility controls for that lab.

Please note: If you are having trouble with the lab running smoothly, navigate to the Quality tab and make sure the Camera Post Processing is unchecked and lower the quality setting.

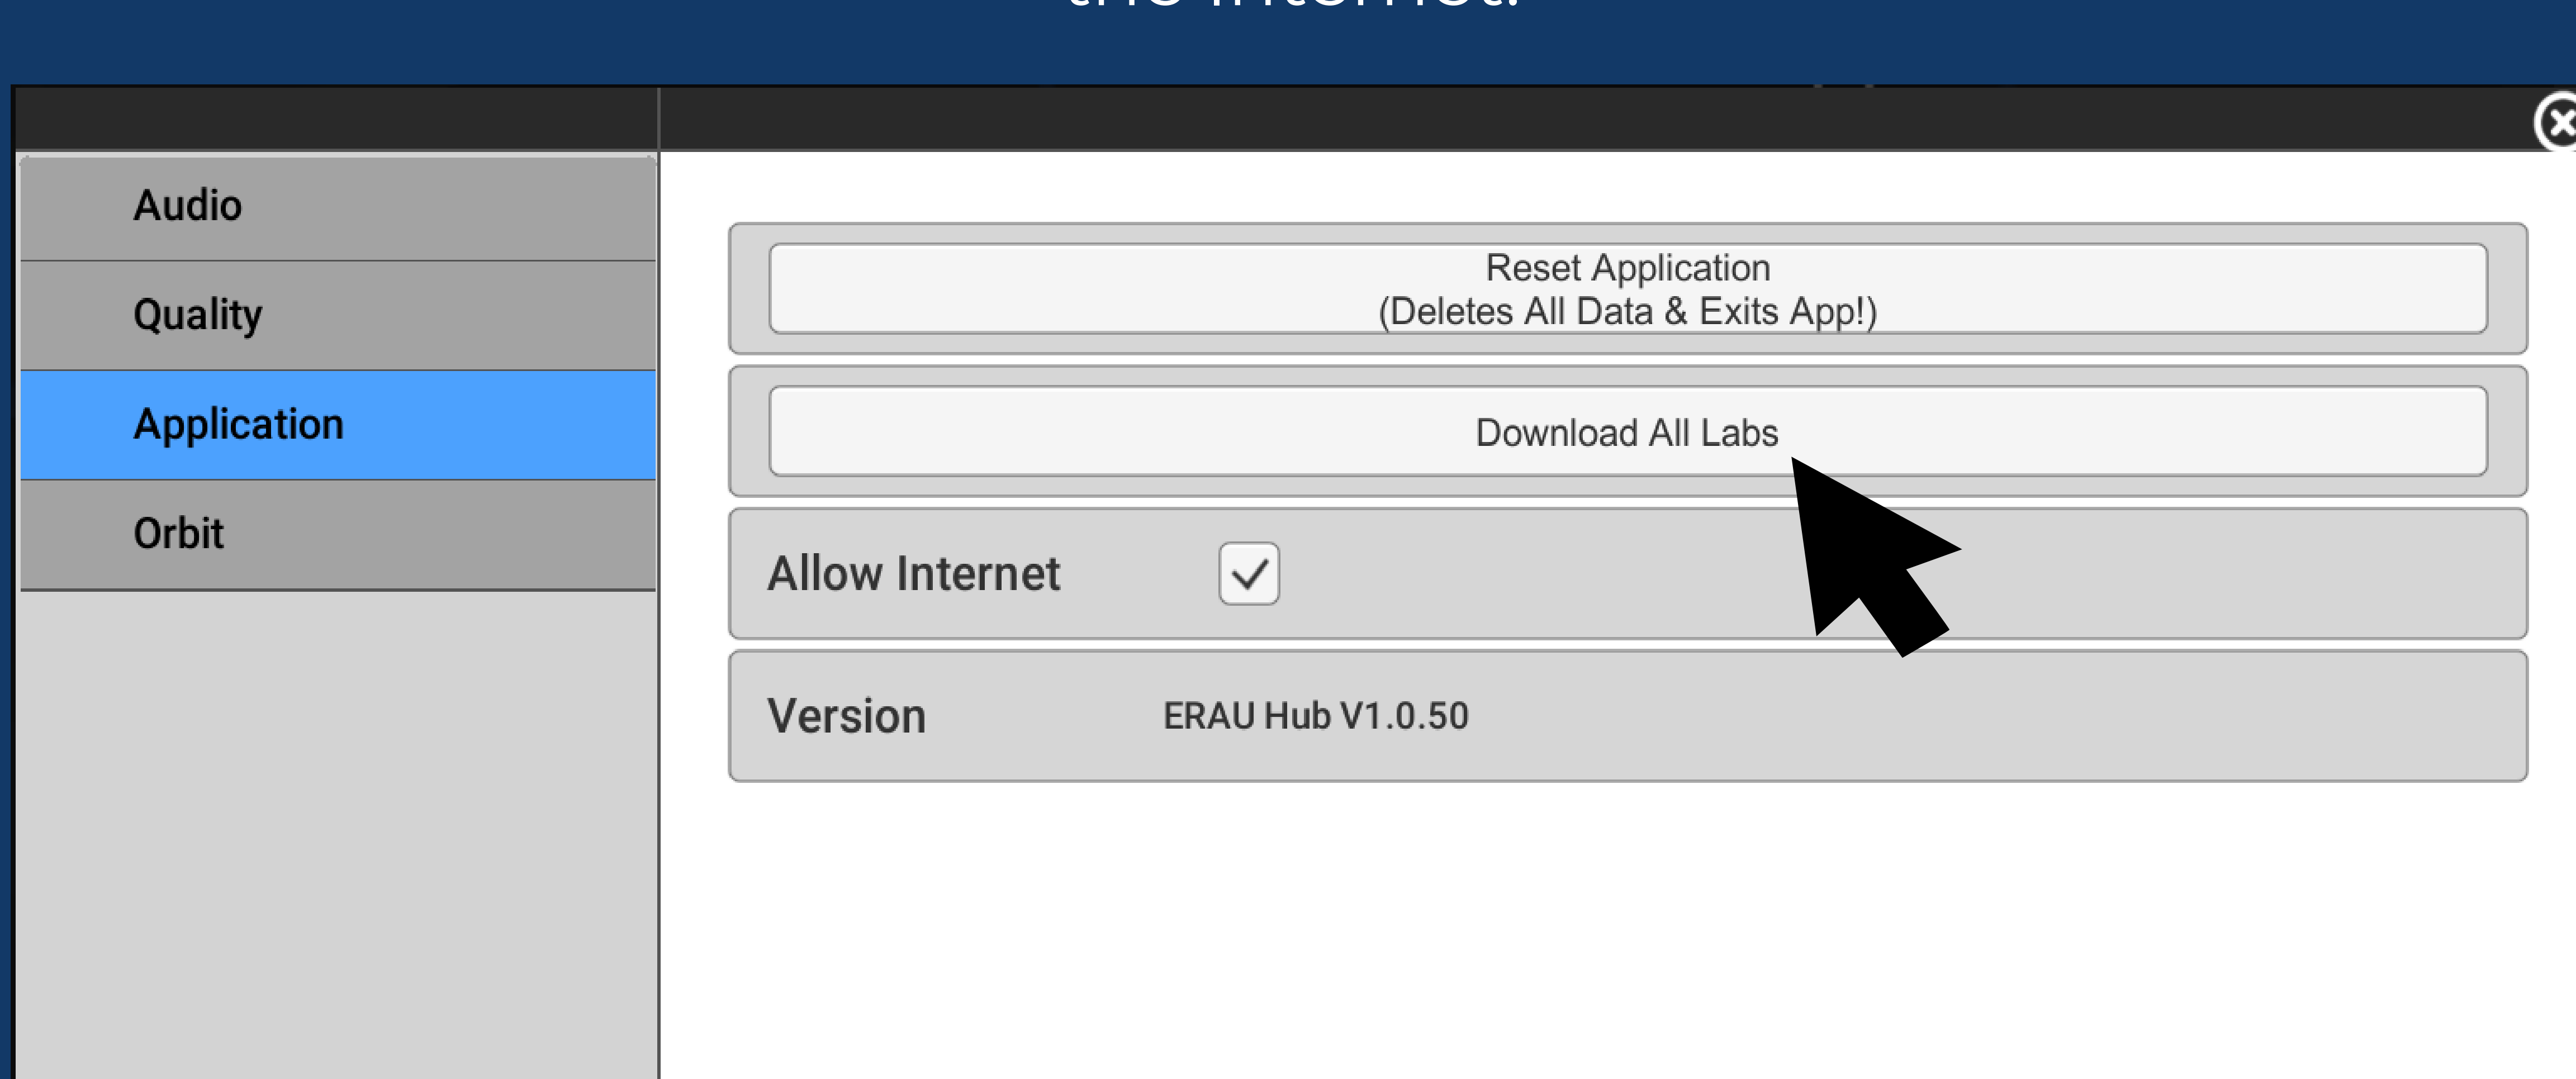

## Recommended for all users

After downloading the lab, click the settings button at the top left corner.

Next under the application tab click the "Download All Labs" button. This will eliminate the requirement to be connected to the Internet.

You Are Now Ready to
