PROCEDURE

STEP 1

Launch the Virtual Hub application by double-clicking on the desktop shortcut.
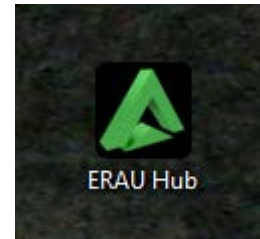

STEP 2

Enter the center door labeled Assembly Lab by pressing E.

STEP 3

Make sure UAS is selected on the Slider to begin assembling the chassis.

STEP 4

Once the UAS is complete you will click the save button in order to save that aircraft for future use. Next you will give the UAS a name. When you want to use a previously saved UAS then you would click the load button.
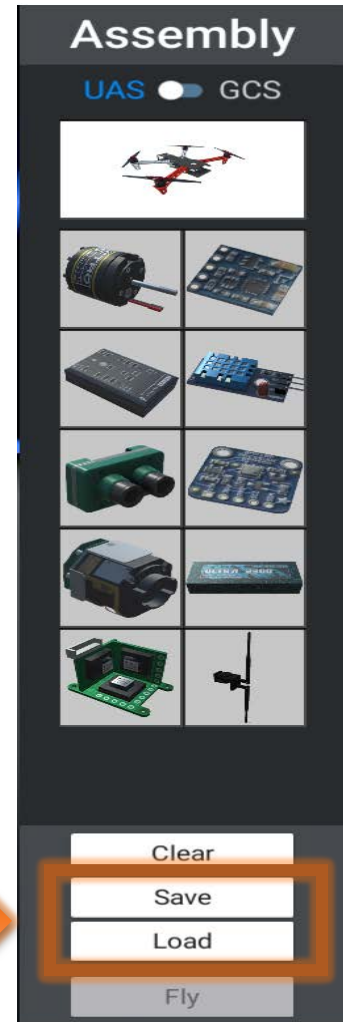

STEP 5

After you click the load button you will select the desired UAS then click the next "Load" button.
